

Creating a Mobile Warehouse

Leading warehouse, distribution, and fulfillment operations are transforming to meet the demands of the today's on-demand economy. For many, keeping pace means investing in a variety of mobile devices that help people work smarter, faster, and more accurately than ever.

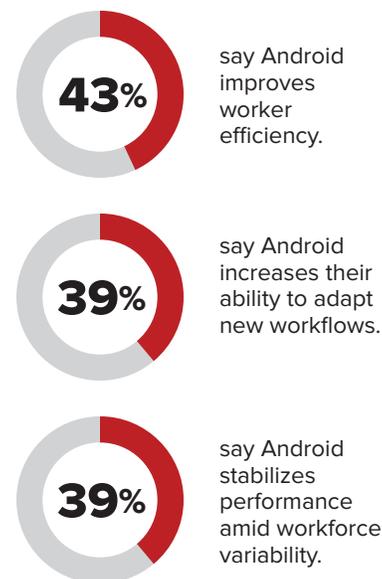

INVESTING IN MOBILE DEVICES

More than three out of five warehouse decision makers say they are planning to upgrade or add mobile devices within the next few years.

ANDROID LEADS THE WAY

More than eight out of ten warehouse leaders say they currently use or plan to use the Android operating system by 2024. **The most common reasons they cite for the move to Android are efficiency, flexibility, and consistency:**

WHERE MOBILITY TOOLS ARE MAKING A DIFFERENCE

Warehouse leaders say they expect the use of mobile devices to be nearly universal across a wide range of warehouse applications by 2024.

INCREASE PRODUCTIVITY

Reduce the time workers spend moving back and forth between workstations to finish more tasks in less time.

INCREASE ACCURACY

Eliminate error-prone manual processes and capture data in real time with greater accuracy and less effort.

IMPROVE CUSTOMER SATISFACTION

Turn orders faster, improve accuracy, and increase traceability to earn and hold customers' trust.

IMPROVE SAFETY

Make it easier for employees to focus on their work, reducing the chances of accidents or injury.
