

BUILD A WELL-CONNECTED WAREHOUSE

The demands for performance in warehouse operations are greater than ever. To deliver results, stay ahead of the competition, and keep customers happy, managers are increasingly looking toward tools and devices that increase the mobility of their warehouse workforce.

Mobile technology can help you . . .

Eliminate visibility gaps

Improve connections between workflows

Identify blind spots and inventory bottlenecks in real time

Cope with rising workflow complexity

To create a mobile warehouse workforce that delivers high-impact benefits . . .

Streamline inventory management

Improve order speed and accuracy

Reduce errors and non-compliance

Increase customer satisfaction

A mobile warehouse workforce not only improves efficiency and productivity, but also allows for better allocation of resources.

Using mobile printers and hand-held computers during receiving and putaway processes can reduce processing time and extend the productivity of every mobile worker.

Mobile technologies enable barcode and RFID technologies that reduce the time it takes to identify and track inventory.

Using the latest devices, a mobile workforce can use new tools and technologies to accelerate picking time and ship orders faster.

With real-time location systems (RTLS) and mobile workforces, warehouses can reduce staging area requirements and optimize travel times to enhance productivity and reduce overhead.

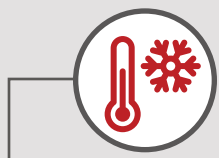

Mobile devices give warehouse managers the visibility they need to reduce costs associated with errors and non-compliance.

- ▶ Mobile devices enable **real-time access to warehouse management systems (WMS)**, so the status of orders and returns can be instantly updated and validated.
- ▶ Mobile technologies enable **real-time visibility into inventory status** to support informed decision-making.
- ▶ Using the latest devices, a mobile workforce can **reduce expensive picking errors**.
- ▶ Handheld computers and mobile printing can **streamline the final stages of order fulfillment**, ensuring label compliance and order accuracy.

What Sets Zebra Rugged Devices Apart in the Warehouse?

There's no typical day in the warehouse—that's why Zebra rugged mobile computers and tablets are engineered to deliver the reliability, durability, and performance you need in any environment.

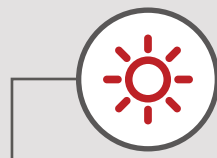

Protection from the most extreme elements

Form factors built to handle refrigerated and unairconditioned warehouses.

Rugged design

Tough exteriors protect against drops and rough handling.

Increased visibility in bright environments

Screens are designed for easy visibility under difficult lighting conditions.

Peak performance that lasts the entire shift

Extended-life batteries deliver full-shift performance without recharging.

Connect virtually anywhere, anytime

Access critical data even in areas with sub-optimal reception.

Put the benefits of a mobile workforce to work in your operations.
